Education

2020-04 - 2020-07

Udacity

Nanodegree Program, Front End Developer

https://confirm.udacity.com/LEHCJM7A

The goal of the Front End Web Developer Nanodegree program is to equip learners with the unique skills they need to build and develop a variety of websites and applications. Graduates of this Nanodegree program will be able to construct responsive websites using CSS, Flexbox, CSS Grid, and SASS to develop interactive websites and UI (User Interface) applications using JavaScript and HTML
and connect a web application to backend server data using JavaScript. Students will also build competency automating application build and deployment using Webpack and improving the offline performance of websites using Service Worker.
